Re: Björk J, Ardö J, Stroh E, Lökvist H, Östergren P-O, Albin M. Road traffic noise in southern Sweden and its relation to annoyance, disturbance of daily activities and health. Scand J Work Environ Health 2006;32(5):392–401.

With the exception of the values for age and body mass index, all of the values listed under the headings “All”, “Average ≥ 55 dB(A)”, “Maximum ≥ 70 dB(A)”, and “Annoyance from road traffic” are percentages. For age and body mass index the values given are the medians and 2.5th–95th percentiles. The editors apologize for the mislabeling of the published table.
