

Biomarkers of stress in relation to occupational health

14–18 August 2006, Copenhagen (Denmark)

The second international course on the biomarkers of stress in relation to occupational health is being organized by the Nordic Institute for Advanced Training in Occupational Health (NIVA), and it will be held on 14–18 August 2006, in Copenhagen, Denmark.

The aim of the course is to provide a state-of-the-art overview of the use of biomarkers as a measure of the effects of stressors.

The course is meant for occupational health professionals, researchers, and PhD students involved in measurements and exposure assessment, in the work environment, with a particular interest in occupational medicine.

Please direct additional questions to the course secretary of the NIVA:

Work-related musculoskeletal disorders—current research trends

3–6 September 2006, Oslo (Norway)

Work-related Musculoskeletal Disorders—Current Research Trends is the seventh international seminar on this topic, and it will be held on 3–8 September 2006 in Oslo, Norway.

The objective of the seminar is to provide knowledge and to enable discussion across disciplines and different approaches in research.

The course is primarily aimed at occupational health care professionals, occupational health researchers, and health care personnel interested in work-related musculoskeletal disorders.

Applications of toxicology in occupational health

4–8 September 2006, Saariselkä (Finland)

The first international course on applications of toxicology in occupational health is being organized on 4–8 September 2006, Saariselkä, Finland.

The course will provide an overview of toxicologic principles and an understanding of the toxic mechanisms of metals, solvents, small particles, and the like, and how to apply the information gained to risk analysis in workplaces and to strengthen the participants' practical skills.

Occupational health professionals, health and safety officers in companies, and other experts in the field are welcome to participate in the course.
