

Introduction to occupational epidemiology

21—25 August 2001

The course Introduction to Occupational Epidemiology will be held on 21—25 August 2001 at the Hotel Gentofte in Copenhagen, Denmark, by NIVA (Nordic Institute for Advanced Training in Occupational Health). The objective of the course is to enable the participants, in collaboration with a statistician, to design and carry out small epidemiologic studies on occupational health risks. The course will concentrate on conventional nonexperimental studies but will also deal with intervention studies. It is meant for persons with no or little experience in epidemiology. At the end of the course the students are expected to have read and understood Sven Hernberg's textbook on occupational epidemiology. The applicants should be research workers, industrial medical officers, occupational hygienists or sociologists.
