

*Re: Nurminen M, Karjalainen A. Epidemiologic estimate of the proportion of fatalities related to occupational factors in Finland. Scand J Work Environ Health 2001;27(3):161—213.*

During the editing of this manuscript the following mistakes occurred:

Page 172, left-hand column, sentence beginning with “Extensive” in row 17 under the heading *Cardiovascular diseases* reads: “Extensive evidence is not available showing that . . . .” It should read “Extensive evidence is **now** available showing that . . . .”

Page 211, Appendix: the “Total” column under “Attributable fraction” has “18.3” listed for “Chronic obstructive pulmonary diseases” for the study by Isoaho et al (230). There should be **no figure** whatsoever given here.

## Scandinavian Journal of Work, Environment & Health

The **Scandinavian Journal of Work, Environment & Health** is an international scientific periodical which began publication in 1975. The Journal appears 6 times a year, at the end of February, April, June, August, October, and December. In addition 1 to 3 self-financed supplements on specific topics are generally published annually.

The circulation of the Journal is worldwide. By the end of 2000, the total distribution was about 1200 copies to approximately 50 countries on 5 continents. Most of the subscriptions came from the United States (197), Finland (99), Holland (96), Italy (82), Norway (64), Canada (59), Great Britain (57), Sweden (57), Germany (51), Australia (36), Japan (34), France (32), Spain (32) and Denmark (30).

The Journal is open to all authors without regard to nationality. In 2000, the number of manuscripts submitted for publication in a regular issue was 158. In volume 26, the first author of the 80 published articles (supplements included) was from Sweden (16), Finland (13), Denmark (12), Norway (9), the United States (7), France (6), The Netherlands (3), Italy (2), the United Kingdom (2), Germany (2), Canada (2), Spain (2), Japan (1), Korea (1), Switzerland (1), Brazil (1).

The acceptance rate of the 158 articles submitted in 2000 was 29% by the end of March 2001; at that time the decision was still pending for 15 of the manuscripts.

In a peer-review process, 1 to 4 referees independently evaluate the scientific quality of the submitted manuscripts. The Journal uses a double-blind peer-review system.

The elapsed time from submission to publication for the articles published in 2000 averaged 11 months. A decision of acceptance of a manuscript was reached in 1 to 3 months (average 7 weeks).

The Journal is indexed or abstracted in Current Contents, the Science Citation Index, Biological Abstracts, Excerpta Medica, CISDOCE HSELINE, TZXLIRE, NIOSHTIC, etc.

For the latest year available, 1999, the impact factor of the Journal was 1.756.
