Many thanks for Tor Norseth's very nice review of *Occupational Medicine*.

I do wish, however, to point out an exceedingly important comment in the review, which states: "I found no references to papers published later than 1984. . . ." Actually, there are 377 references for 1985, 1986, 1987,

"accepted for publication," "to be published," and "in press."
